## FALL OF 1895

## Wholesale Trade List

# THOMAS MEEHAN \& SONS 

ESTABLISHED 1852
GERMANTOWN, PHILADELPHIA, PA.

## Hotice . . . . . <br> to Customers

 Seeds, ten cents per pound. Parties are requested to state the mode of conveyance by which they desire their trees forwarded. When no route is named we forward to the best of our judgment; but in no case do we assume any responsibility after the goods are shipped, unless for our own mistakes.Terms.-In all cases cash, on or before delivery to express or railroad agents, unless by special arrangement. Five hundred, fifty, and five, will be furnished at the thousand, hundred, and ten rates respectively. PACKING CHARGED EXTRA.

POST-OFFICE ORDERS PAYABLE AT STATION G, PHILADELPHIA.
Our Retail Catalogue is complete and will be sent to all applicants.

Visitors are always welcome, and should take train at 12 th and Market Streets, Philadelphia, for Chestnut Hill, getting off at Walnut Lane Station ;--or at Broad and Filbert Streets, getting out at Carpenter Street Station. Trains run every half hour, both ways. Cabs at both stations. The Eighth Street Electric cars come to within two squares of our Nurseries; leave cars at Church Street, Germantown.

In ordering stock sent by mail, add ten cents on every dollar for Deciduous Trees, and fifteen cents for Evergreens, to prepay postage. For Parties are requested to state the mode

## Deciduous Trees.

## THE LETTERS "TR" SIGNIFY THAT THE STOCK HAS BEEN ONCE OR MORE TRANSPLANTED, " $\mathbf{S}^{\prime \prime}$ THATIT IS STILLIN SEEDLING BEDS.

The Colchicum Maple is one of the best of those of medium size, it makes a somewhat round, spreading head, similar to a Norway Maple, and in fact does not look unlike that sort. The young leaves on the ends of the shoots have a reddish-purple color. If cut to the ground when planted it makes a large bushy tree from the ground, with several trunks, and in this manner on a lawn it gives a verylpretty appearance. It is not hardy in the extreme north. A very valuable tree for park or cemetery use.

## JAPAN MAPLES.

We call special attention to our stock of Fapanese Maples, believing that it is larger than any in the United States, and it is all of our own growing. Of the Purple leaved sort, (see cut) we count our plants by the thousands. This sort we grow on its own roots, and being a strong grower it thrives better, and the leaves have a darker and richer color than when grafted. The other sorts, being of a somewhat lighter growth, are best when grafted on a strong growing stock, and we propagate them in that way, training up the central shoot in order to have a leader. It will be noticed that several of the sorts are in pots. This will be found of great assistance in transplanting them. These plants are much finer and more healthy than imported stock, and should not be
 compared with it.

Re The offensive odor of the flowers of the Ailanthus is not nearly as pronounced in the female plants. It is scarcely perceptible.

## JAPAN CHESTNUT.

We have a fine stock of the Japan Chestnut, in various sizes. The sort has become very popular in the last few years, and quantities are being planted for commercial purposes. It makes a small sized tree, and bears when but three or four years of age. The nut is of very large size.

JAPAN JUDAS.-The Japan Judas is not known as well as it should be, though it is unquestionably one of the finest and most beautiful shrubs in cultivation. The flowers are pink and they completely cover the bush the first thing $i_{n}$ spring. It makes a bush about the size of a Lilac; and is used for planting among the larger shrubs in beds or as single specimens. The flowers are darker pink than those of the native tree growing Judas.

## WEEPING DOGWOOD.

## (Cornus Florida Pendula.)

Of all the weeping trees, there is none, to our mind, equal in beauty to this one. It is very hardy, and will thrive from Canada to Florida. As will be seen by the picture of a large specimen on our grounds, the branches are very pendulous, but the leader shoots up as straight as an arrow.
It bears a great profusion of large white flowers in spring, followed by bright red berries in fall, just the same as the White Flowered sort.
After growing it for upwards of ten years, we can recommend it as one of the finest ornamental weeping trees grown.

## WHITE FLOWERED DOGWOOD.

## (Cornus Florida.)

We believe that our stock of this beautiful ornamental tree is larger than can be found in any other establishment in the world. We have no less than 40,000 seedlings alone. It is one of our specialties. It always sells well, as it is a plant that we can recommend, its beauty at all seasons pleasing every one.

We have an exceptionally fine stock of the following Beeches:

## AMERICAN BEECH, EUROPEAN BEECH, RIVERS' PURPLE-LEAVED BEECH. FERN LEAVED BEECH, WEEPING BEECH,

Our Rivers' Purple Beech are all grafted, and are thrifty stock. The Weeping have had the leaders trained to a stake so that they have a good straight central shoot, unlike most Weeping Beech sold. We call partıcular attention to the American Beech as being particularly adapted for hedging purposes, where a good hardy ornamental hedge is required. It has been well known for a number of years that the European Beech makes a beautiful hedge, but only lately that the American was equally as fine.

## Chinese and Japanese Magnolias.

0 We call particular attention to our stock of these Magnolias, which, with but one or two exceptions, are grown on their own roots. The Hypoleuca, Slellata and Watsoni are in pots, making it possible to ship them and give better results than when these sorts are taken from the open ground. The Soulangeana are extra fine stock, bushy and well rooted.

## OAKS.

Oaks are our specialty, and we have the largest quantity of them of any nursery in the country.

At one time they had the reputation of being of slow growth. While this may be true of them in Europe, it is not so here. In our nursery they grow just as fast as any other ordinary tree. Our sales of them increase every year. The White, Scarlet, Mossy Cup, Pin, Red and Black, are particularly fine sorts.

The cut illustrates a Pin Oak growing on our grounds.

## JAPAN HARDY HYDRANGEA.-Hydrangea paniculata grandiflora,

Note the fine stock of these we have to offer. The prices too are low.

## JAPAN SNOWBALL-Viburnum plicatum.

That this is one of the most beautiful and popular shrubs there is no question. Our stock consists of many thousand plants. It is far superior to the old Snowball in every respect. It does not straggle about ; the leaves are of a beautiful dark green color all summer and right up until frosty weather. The young shoots have a coppery color, which is quite conspicuous. It is a plant that every nurseryman and dealer should offer in his catalogue. This electrotype furnished to purchasers of plants free of charge, when asked for.

## WEIGELA FLORIBUNDA, (Dark Crimson Weigela.)

This is the best of the dark flowered Weigelas, and should be included in all lists. The flowers are claret colored, very conspicuous, and a little later than the other sorts. It is a good strong grower.

## Tree and Fruit Seeds.

## EVERGREENS.

## DECIDUOUS TREES AND SHRUBS.

## VINES AND CLIMBERS.

## FRUITS.

We can generally supply by the bushel, Apple, Cherry, Plum, Peach, Shellbarks, Walnuts, etc., and will give rates on application ; also Honey Locust and Osage Orange.

Our Retail Catalogue of Trees. Shrubs, etc., will be sent free to all applicants.

## FRUIT STOCKS and FRUIT SEEDS

Our stocks, as usual, have been selected with extra care, and we guarantee them to be of the very best. They will be fully up to the following grade :

## Extra sized, $1=4$ inch and up First=class, 3=16 and up <br> Second=class, 2=16 to $3=16$

All stock will be packed with the utmost care, but we do not guarantee the safe arrival of any shipment, if ordered sent in the winter. We will hold any orders until Spring, in our storage cellars, when desired. Packing charged extra, but only sufficient to cover cost of time and material consumed. Stocks are ready for shipment about the middle of December.

## FRUIT STOCKS

## FRUIT S円円DS

We have a very fine selection of fruit seeds, and we believe that our customers will find them unequalled by those offered by any other house.

We give no guarantee with our seeds, either expressed or implied. If the seeds are not accepted on these terms they must be returned at once. If they are kept, it will be taken as proof that they are satisfactory. All claims must be made on receipt of goods. Samples on application. Fresh French Crab and Pear seed for shipment about Feb. Ist.

# Thomas Meehan \& Sons GERMANTOWN, PHILA., PA. 

## (Viburnum plicatum)

A new variety of Snowball from Japan. Growth upright and compact. Foliage olive green through the summer, but toward fall it turns much darker and remains on the plant for some time after the first frosts. Flowers, though hardly as large as the old variety, are much more numerous. The leaves are in pairs along the stem, and from the base of each leaf a ball of flowers appears. There are often as many as ten pairs of these, or twenty balls, on a branch eighteen inches long. These balls, as they expand, all face upward, so that a full view of their great beauty is always to be had. To be a universal favorite a shrub must be hardy, easily transplanted and its growth of good shape, and beautiful both in leaf and flower, and the Japan Snowball embraces all of these points to the fullest extent. See page 24 .

We furnish the above electrotype to customers for 50 cents, postpaid.
